Quick Start Electrical Controls

New London Engineering stocks a wide variety of starters, electrical components and pre-wired fixed and pre-wired variable speed drive packages. Add a pre-wired Quick Start control package to your conveyor and it's ready to run when it arrives.

ToughTrak Common Features

FRAME	INFEED PULLEY	DRIVE PULLEY FACE	STANDARD BELT	SUPPORTS
12 Gauge x 1 ³ / ₄ " deep (FW = BW + 31/32")	1 ⁵ / ₁₆ " Diameter Flat Face x 1 ¹ / ₂ " Bore	Crown Face Knurled	2-Ply Black PVC with #36 Unibar Lacing	Adjustable 12 Gauge Unistrut

Discharge

Design and Construction Features

ToughTrak – Tough and Durable Low Profile Conveyors

ToughTrak low profile conveyors are lean and mean working machines. These steel fabricated, tough and durable conveyors are built to survive the extreme tests of the manufacturing environment. ToughTrak is not only built to last, they can be built to your exact length and width specifications at a cost lower than any other low profile conveyor.

ToughTrak Low Profile Conveyors are American made and American engineered to work harder and last longer than any competitor in its class. That's why they are called ToughTrak!

ToughTrak Model Comparison

MODEL	APPLICATION	DRIVE PULLEY DIA.	DRIVE PULLEY BORE	DRIVE PULLEY BEARING	DRIVE PULLEY HEAD PLATE	DRIVE-MOTOR	TAKE UP/TRACKING
Model 150	Standard Duty Low Profile Applications	1 ⁵ / ₁₆ "	5/8"	Pressed in Precision Bearings	Machined 1/2" Thick	Gearmotors	Internal @ Infeed Internal @ Discharge
Model 250	Heavy Duty Low Profile Applications	2 ⁷ / ₈ "	3/4"	2 Bolt Flanged Grease Sealed	10 Gauge Formed	Motor-Reducer Combinations with 56 C Frames	Internal @ Infeed External @ Discharge

Infeed

ToughTrak Features and Benefits Summary

1. Tough & Durable Steel Construction

- With ToughTrak you don't have to compromise your conveyors length or width since its steel construction can be made to your exact lengths and widths. (Up to 24" wide and/or 20'6" long)
- ToughTrak is constructed with U.S. made hot rolled, high quality steel. ToughTrak is engineered to survive the extreme tests of the manufacturing environment.

2. Discharge end belt tension/take up system with a 3¾" of belt take up

- Unlike the competition, ToughTrak's belt take up system is on the conveyor's discharge end and not at the infeed. Since the discharge end is often the most accessible end of the conveyor, belt tensioning is completed quick and easy.
- In some applications the belt will stretch and the resulting slack must be "taken up". ToughTrak is engineered to provide 3¾" of belt take up (2½" at discharge and 1¼" at infeed). This much take up means belts can be used longer saving you money, time and replacement part frustrations.

3. Rugged and Durable One piece, 12 gauge frame and bed with detachable bottom pan

- ToughTrak's frame and bed are laser cut from a single piece of steel providing a strong, smooth low friction slider bed surface.
- The formed frame includes a detachable bottom pan providing unmatched pinch point protection below the conveyors frame. ToughTrak's primary competitors cannot match this safety feature.

4. Bolt on Side Rails, Supports and Accessories

- The side rails, supports and accessories are easily installed and removed as necessary.

5. Quick belt change feature with U.S. standard fasteners

- When it's necessary to change a belt, hunting for metric wrenches or the costly special tool kit required by some competitors can be frustrating. American made ToughTrak eliminates this hassle since the belt can be changed with only one tool. Yes! ToughTrak belts can be changed in 10 minutes or less using only a ⅜" Allen wrench. NOTE: the same wrench removes the supports and side rails.

6. Adjustable 12 Gauge Unistrut style supports

- These rugged and durable 12 gauge steel supports are designed to meet the demands of the manufacturing environment. ToughTrak supports are also readily adjustable.

7. Tough and Durable Hammertone Paint

- Specially formulated durable Hammertone Paint protects your investment against corrosion and cosmetic damage.

8. Belt Selection

- Describe your application and we will provide the right belt! New London Engineering stocks belts ranging from economical PVC to dependable Urethane. Quick delivery is not a problem since both lacing and endless belting capabilities are available on site.

9. Quick Shipments

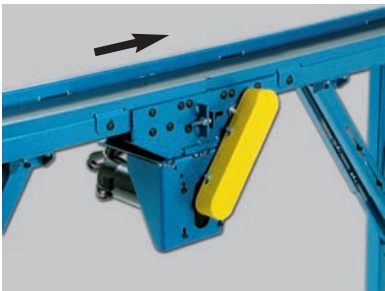

- Many sizes and speeds are available in our UpTime Express – 24 hour ship program.

10. ToughTrak is American made and American Engineered

Endless Belt Quick Belt Change Feature

Change Belts in 10 minutes or less

1. Loosen the socket head take up screws within the internal belt tension system.
2. Loosen the fasteners on both the infeed and drive pulleys and slide both pulleys toward the center of the conveyor.
(Note: Try to slip the belt over the frame. If the belt will not slip over the frame, go to step 3.)
3. Remove the head plate from the drive end pulley. Slide the belt over the pulley and off the conveyor.

Standard Speed Options

All speed options are available in Variable Speed. Other Speeds are available upon request.

Stainless Steel

12-Gauge Dull Mill #304-2B Finish

Level 1 – Fully Loaded Stainless Steel Construction

All the conveyor components, hardware, belt lacing and options are produced with non magnetic stainless steel.

Level 2 – Surface Component Stainless Steel Construction

All the surface and exposed components are replaced with non-magnetic stainless steel. All other components remain standard.

CUSTOM AND STANDARD CONVEYORS

We are a full line conveyor supplier specializing in engineering high quality, quick delivery conveyors.

- Accumulation Conveyors
- Belt Driven Live Roller Conveyors
- Bulk Material Handling Conveyors
- Cleated Belt Parts Conveyors
- Chain Driven Live Roller Conveyors
- Chain Transfers
- Drag Conveyors
- Floor-to-Floor Conveyors
- Gravity Roller
- Magnetic Conveyors
- Pallet Dispensers
- Power Roller Conveyors
- PlastiTrak - A full line of plastic belt conveyors
- Quick Start Electrical Controls
- Slat Conveyors
- Slider Bed Conveyors
- Specialty Conveyors
- SteelTrak - Hinged Steel Belt Conveyors
- ToughTrak - Tough and durable thin line conveyors
- Turntables
- UpTime Express - 24 hour shipments
- V-Belt Conveyors
- Wire Mesh Conveyors
