

MATERIAL SUPPORT BRIDGES

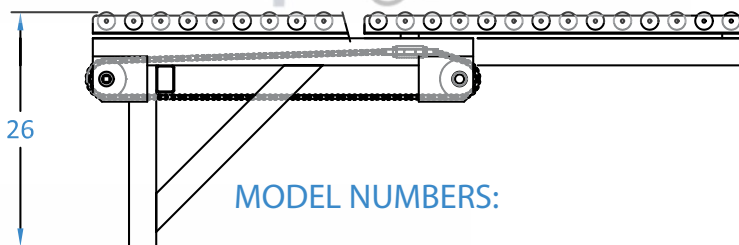

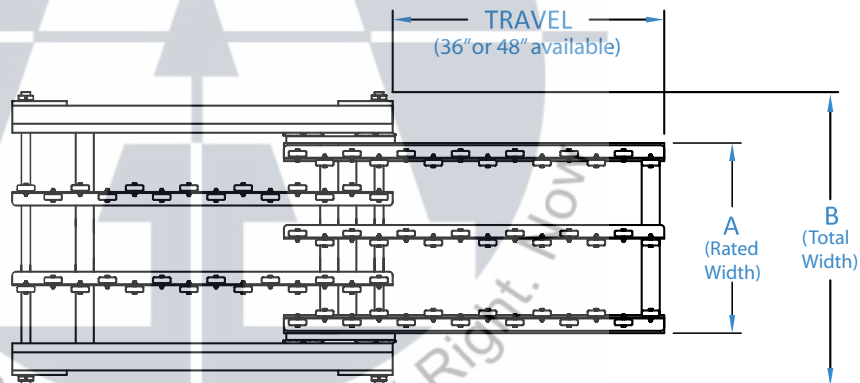

Material support bridges from Feed Lease are an excellent way to finish your feed line, any brand, new or used. The supports bridges attach to the exit of the feeder to support the material as it exits the feed and enters the die.

Standard equipment:

- Heavy duty welded steel tubing construction
- Designed for your feeder and press
- Can be included with a new Feed Lease feed system to complete the line
- Flow rail assembly for smooth material gliding
- Hand crank extension and retraction

Optional Equipment

- Powered extension and retraction
- Modified designs for unique applications
- Non-marking, neoprene rolls for surface-critical materials
- Wide steel or nylon rollers for heavy-duty applications
