Light Duty Belt Driven Live Roller Conveyor Transportation Type

1.9 in. dia. x 16 ga. Galvanized "Pop-Out" Tread

Model BDRE-T provides a versatile means of transporting products of varying sizes and shapes. The tread rollers are driven by a belt which is forced against the tread roller by a pressure roller.

Model BDRE-T

- Bolt-Together Construction
- 6 1/2 in. x 1 1/2 in. x 12 ga. Galvanized Frame
- Between Frame Widths 13 in. Through 39 in.
- Reversible (With Center Drive)

Intermediate Cross Section

* Other widths are available as standard from 13" through 39".

NOTE: A short belt segment laced on both ends, commonly called a "dutchman", is provided with conveyors over 47 ft. OAL. This allows future belt stretch with standard end take-up. If a short segment is not desired, a center drive/take-up is required.

Standard Specifications:

Belt - 6 in. wide PVC-120 with clipper lacing. 12 in. wide for 32 in. between frame and larger.

Bed - Roller bed with 1.9 in. dia. x 16 ga. galvanized "pop-out" tread rollers spaced on 3 in. centers and 1.9 in. dia. x 16 ga. galvanized pressure rollers spaced on 6 in. centers. Mounted in 6 1/2 in. deep x 1 1/2 in. x 12 ga. galvanized steel channel frames. Standard 5 ft. and 10 ft. long bolt-together sections with bolt-on end couplers.

Floor Supports - Adjustable 34 1/2 in. to 39 in. top of roller with 4 in. drive or 33 1/2 in. to 39 in. for 8 in. drive. One support at every bed joint and at ends of conveyor.

Cross Bracing - Rods with turn buckles supplied on every other section for conveyors 30 ft. and longer. Allows frame to be squared to improve belt tracking.

Drive Pulley - 4 in. dia. with 1 3/16 in. dia. shaft or 8 in. dia. with 1 7/16 in. shaft, crowned and fully lagged.

Tail Pulley - 4 in. dia. with 1 3/16 in. dia. shaft, crowned.

Snub Roller - 2 1/2 in. dia. galvanized with grease packed ball bearings (adjustable).

Return Rollers - 1.9 in. dia. galvanized with grease packed ball bearings.

Take-Up - Provides belt take-up at tail pulley to allow for future belt stretch.

Bearings - Sealed, pre-lubricated, self-aligning ball bearings on drive and tail pulleys.

Conveying Speed - Constant 60 FPM.

Speed Reduction - Sealed worm gear "C" face speed reducer with No. 50 chain to drive pulley.

Motor - 1/2 HP - 230/460 V - 3 Phase - 60 Hz. - totally enclosed, fan cooled.

Electrical Controls - Available as option.

Frame Capacity - Max. load per linear foot with legs on 10 ft. centers = 310 lbs. Not to exceed capacities in chart on next page.

4 in. End Drive

8 in. End Drive

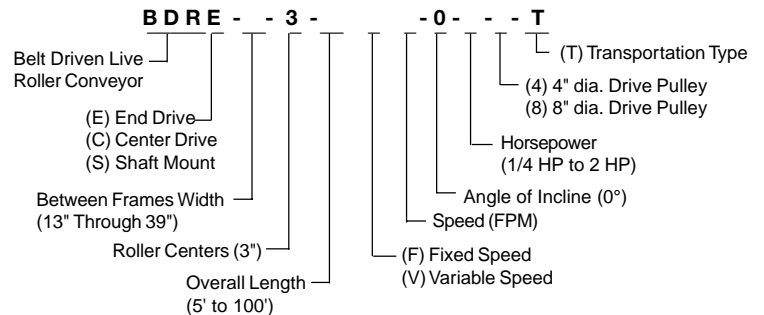

Standard Right-Hand Drive Location

* 8 in. dia. drive pulley in lieu of 4 in. dia. drive pulley

Transportation Type BDLR Model Number:

Optional Equipment:

Belt - 3-ply neoprene friction surface.

Conveying Speed - Constant and variable speeds available other than standard 60 FPM.

Center Drive - Provides additional belt take-up and is suitable for reversible applications.

Roller Centers - Tread rollers spaced on 4 in., 6 in., 8 in. or 9 in. centers. *CAUTION: With tread rollers on centers over 3 in. there is an increased likelihood of a person's hand, foot, clothing, etc. slipping between the rollers. OMNI MUST RECEIVE WRITTEN ACKNOWLEDGMENT that the end user is aware of the potential safety hazard and will safeguard accordingly.*

Fixed Angle Guard Rails - 1 1/2 in. x 2 in. or 1 1/2 in. x 6 in. formed 12 ga. galvanized angle. Other heights available. Channel types available. One or both sides. Spaced up to allow rollers to pop out.

Note: If product contacts guard rail, product flow may be affected.

Floor Supports - Heights available up to 84 in. top of leg.

Ceiling Hangers - 5/8 in. dia. x 10 ft. long threaded rod with mounting hardware. Other lengths available.

Tail Pulley - 6 in. dia. with 1 3/16 in. dia. shaft, crowned.

Other Drive Types - Shaft mount, side mount chain driven to allow lower top of belt.

Motors - Single phase, explosion proof, drip proof, DC motors, inverter duty, etc. Available through 2 HP.

Electrical Controls - Start-stop push-button station, reverse drum switch, one direction and reversible magnetic starters.

Tread Rollers - 1.9 in. dia. x .145 in. wall., 1.9 in. dia. x 13 ga.

Blade Stops - Pneumatically or manually operated blade that pops up between rollers in order to accumulate product.

Pusher Device - Used to automatically divert product. Ram head is pneumatically actuated to divert product at 90° onto another conveyor, chute, etc.

Transfer Device - Chain or V-Belt. An air operated lifting device that raises above the roller surface to transfer product off at 90°.

Zero-Pressure Accumulation - Allows product to accumulate without build-up of line pressure. Optional positive brakes for each zone. Sensor roller or photo-eye controlled logic.

Light Duty Belt Driven Live Roller Conveyor

Minimum Pressure Accumulation Type

1.9 in. dia. x 16 ga. Galvanized "Pop-Out" Tread

Model BDRE-M provides an inexpensive means of accumulating products with minimum back pressure. The tread rollers are driven by a belt which is forced against the tread roller by a pressure roller.

Model BDRE-M

- Bolt-Together Construction
- 6 1/2 in. x 1 1/2 in. x 12 ga. Galvanized Frame
- Between Frame Widths 13 in. Through 39 in.
- Reversible (With Center Drive)

Medium Duty Belt Driven Live Roller Conveyor Transportation Type

1.9 in. dia. x 16 ga. Galvanized or 1.9 in. dia. x .145 in. Wall Unplated "Pop-Out" Tread Rollers

Model MDBDLR is a welded version of Model BDRE-T on page 196. This allows greater frame capacity and wider between frame dimensions. It is an economical choice for products too large for the bolt-together version.

- Welded Construction
- 6 1/2 in. x 1 1/2 in. x 10 ga. Frame
- Between Frame Widths 13 in. Through 50 in.
- Reversible (With Center Drive)
- 1.9 in. dia. x 16 ga. Galvanized Tread Rollers For 13 in. - 39 in. Between Frames
- 1.9 in. dia. x .145 in. Wall Unplated Tread Rollers For 40 in. - 50 in. Between Frames

Belt Driven Live Roller Conveyors

Standard Specifications:

Belt - 6 in. wide PVC-120 with hidden clipper lacing. 12 in. wide for 32 in. between frame and larger.

Bed - Roller bed with 1.9 in. dia. x 16 ga. galvanized or 1.9 in. dia. x .145 in. wall unplated "pop-out" tread rollers spaced on 3 in. centers and 1.9 in. dia. x 16 ga. galvanized pressure rollers spaced on 6 in. centers. Mounted in 6 1/2 in. deep x 1 1/2 in. x 10 ga. painted steel channel frames. Standard 5 ft. and 10 ft. long welded sections with welded-in end couplers.

Floor Supports - 3 in. structural channel legs with 4 in. adjustment. Available up to 89 in. top of roller. One support at every bed joint and at ends of conveyor.

Drive Pulley - 4 in. dia. with 1 3/16 in. dia. shaft, 8 in. dia. with 1 7/16 in. dia. shaft or 1 11/16 in. dia. shaft, crowned and fully lagged.

Tail Pulley - 4 in. dia. with 1 3/16 in. dia. shaft, 6 in. dia. with 1 7/16 in. dia. shaft, crowned.

Snub Roller - 2 1/2 in. dia. galvanized with grease packed ball bearings (adjustable).

Return Roller - 1.9 in. dia. galvanized with grease packed ball bearings.

Take-Up - Provides belt take-up at tail pulley to allow for future belt stretch.

Bearings - Sealed, pre-lubricated, self-aligning ball bearings on drive and tail pulleys.

Conveying Speed - Constant 60 FPM.

Speed Reduction - Sealed worm gear base mount speed reducer with No. 50 chain to drive shaft.

Motor - 1/2 HP - 230/460 V - 3 Phase - 60 Hz. - totally enclosed, fan cooled.

Electrical Controls - Available as option.

Frame Capacity - Max. load per linear foot with legs on 10 ft. centers = 360 lbs. Not to exceed capacities in chart on next page.

4 in. End Drive

8 in. End Drive

Standard Right-Hand Drive Location

Optional Equipment:

Belt - 3-ply neoprene friction surface.

Conveying Speed - Constant and variable speeds available other than standard 60 FPM.

Center Drive - Provides additional belt take-up and is suitable for reversible applications.

Roller Centers - Tread rollers spaced on 4 in., 6 in., 8 in. or 9 in. centers. **CAUTION:** *With tread rollers on centers over 3 in. there is an increased likelihood of a person's hand, foot, clothing, etc. slipping between the rollers. OMNI MUST RECEIVE WRITTEN ACKNOWLEDGMENT that the end user is aware of the potential safety hazard and will safeguard accordingly.*

Fixed Angle Guard Rails - 1 1/2 in. x 2 in. or 1 1/2 in. x 6 in. formed 10 ga. Other heights available. Channel types available. One or both sides. Spaced up to allow rollers to pop out. **Note: If product contacts guard rail, product flow may be affected.**

Floor Supports - Larger structural channel legs available.

Ceiling Hangers - 1/4 in. formed angle mounted to underside of conveyor. Hanging hardware not included.

Tread Rollers - 1.9 in. dia. x 13 ga. rollers. 2 1/2 in. dia. x 11 ga. is also available but requires 7 in. high frame.

Other Drive Types - Shaft mount, side mount chain driven to allow lower top of belt.

Motors - Single phase, explosion proof, drip proof, DC motors, inverter duty, etc. Available through 2 HP.

Electrical Controls - Start/stop push-button station, reverse drum switch, one direction and reversible magnetic starters.

Blade Stops - Pneumatically or manually operated blade that pops up between rollers in order to accumulate product.

Pusher Device - Used to automatically divert product. Ram head is pneumatically actuated to divert product at 90° onto another conveyor, chute, etc.

Transfer Device - Chain or V-Belt. An air operated lifting device that raises above the roller surface to transfer product off at 90°.

Minimum Pressure Accumulation - Provides an inexpensive means of accumulating products with minimum back pressure.

Zero-Pressure Accumulation - Allows product to accumulate without build-up of line pressure. Optional positive brakes for each zone. Sensor roller or photo-eye controlled logic.

Heavy Duty Belt Driven Live Roller Conveyor

Transportation Type

2 1/2 in. dia. x 11 ga. "Pop-Out" Tread Rollers

Model HDBD is ideal for applications conveying heavy palletized or other similar product that may be side loaded and unloaded from a relatively low elevation (12 in. minimum). Zero-Pressure Accumulation is also an option.

Model HDBD
(Internal mount drive shown)

- **Welded Construction**
- **11 3/4 in. x 1 1/2 in. x 7 ga. Frame**
- **Between Frame Widths Up To 85 in.**
- **Reversible (With Center Drive)**

Standard Specifications:

Belt - PVC-120 with hidden clipper lacing BF dependent.

Bed - Roller bed with 2 1/2 in. dia. x 11 ga. "pop-out" tread rollers spaced on 3 in. centers and 1.9 in. dia. x 16 ga. galvanized pressure rollers spaced on 6 in. centers. Mounted in 11 3/4 in. deep x 1 1/2 in. x 7 ga. painted steel channel frames. Standard 5 ft. and 10 ft. long welded sections with welded-in end couplers.

Drive Pulley - 8 in. dia. with 1 7/16 in. dia. shaft, crowned and fully lagged.

Tail Pulley - 4 in. dia. with 1 3/16 in. dia. shaft, crowned.

Snub Roller - 2 1/2 in. dia. with grease packed ball bearings (adjustable).

Return Rollers - 1.9 in. dia. galvanized with grease packed ball bearings.

Floor Supports - 4 in. structural channel legs with 4 in. adjustment. Available up to 89 in. top of roller. One support at every bed joint and at ends of conveyor.

Take-Up - Provides belt take-up at tail pulley to allow for future belt stretch.

Bearings - Sealed, pre-lubricated, self-aligning ball bearings on drive and tail pulleys.

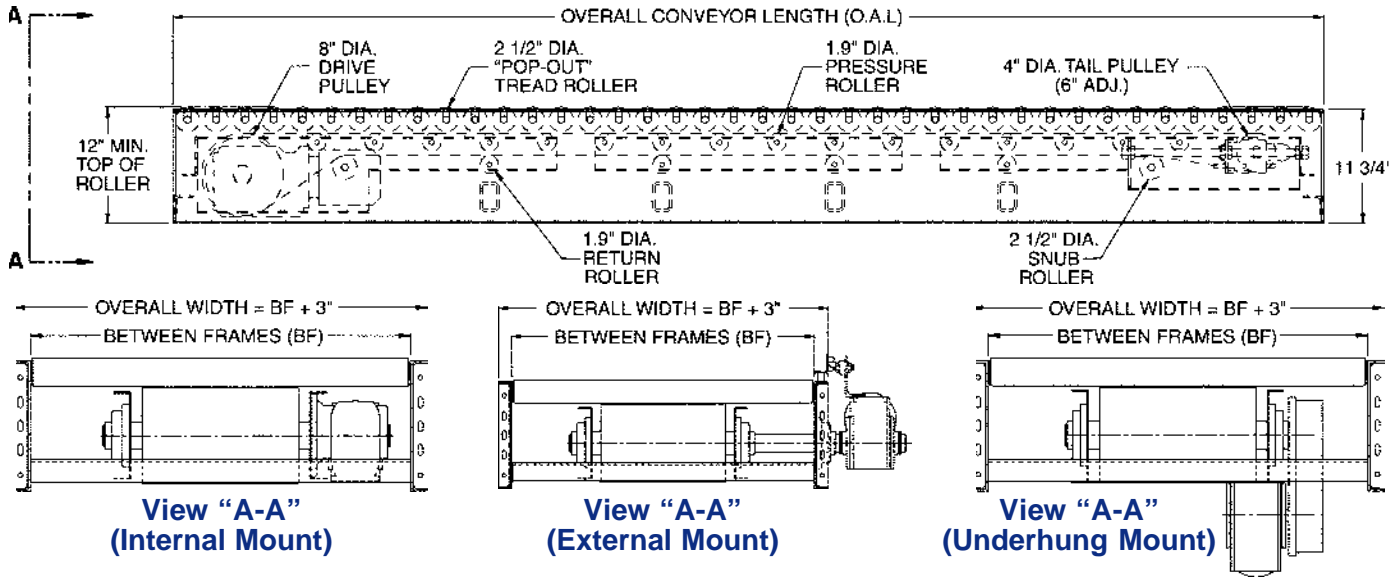

Conveying Speed - Constant 30 FPM.

Motor - 1 HP - 230/460 V - 3 Phase - 60 Hz. - totally enclosed, fan cooled.

Electrical Controls - Available as option.

Frame Capacity - Max. load per linear foot with legs on 10 ft. centers = 1280 lbs. Not to exceed capacities in chart on next page.

* External or underhung mount drive required.

Optional Equipment:

Belt - 3-ply neoprene friction surface.

Conveying Speed - Constant and variable speeds available other than standard 30 FPM.

Center Drive - Provides additional belt take-up and is suitable for reversible applications.

Roller Centers - Tread rollers spaced on 4 in., 6 in., 8 in. and 9 in. available. *CAUTION: With tread rollers on centers over 3 in. there is an increased likelihood of a person's hand, foot, clothing, etc. slipping between the rollers. OMNI MUST RECEIVE WRITTEN ACKNOWLEDGMENT that the end user is aware of the potential safety hazard and will safeguard accordingly.*

Frames - MC 12 x 10.6# Junior Channel.

Fixed Angle Guard Rails - 1 1/2 in. x 2 in. or 1 1/2 in. x 6 in. formed 10 ga. Other heights available. Channel types available. One or both sides. Spaced up to allow rollers to pop out. **Note: If product contacts guard rail, product flow may be affected.**

Other Drive Types - Side mount chain driven to allow lower top of belt.

Motors - Single phase, explosion proof, drip proof, DC motors, inverter duty, etc. Available through 5 HP.

Electrical Controls - Start/stop push-button station, reverse drum switch, one direction and reversible magnetic starters.

Ceiling Hangers - 1/4 in. formed angle mounted to underside of conveyor. Hanging hardware not included.

Floor Supports - Larger structural channel legs available.

Blade Stops - Pneumatically or manually operated blade that pops up between rollers in order to accumulate product.

Tread Rollers - 2 9/16 in. OD x .180 in. wall unplated rollers, 11/16 in. hex spring retained axle or 3 1/2 in. OD x .300 in. wall unplated rollers, 1 1/16 in. hex spring retained axle.

Chain Transfer Device - An air operated lifting device that raises above the roller surface to transfer product off at 90°.

Turntable - Manual, hydraulic or gear motor operated turntable allows short conveyor mounts to rotate. Conveyor mounts to table surface.

Pivoting Device - Device used to pivot a short section conveyor about a fixed point while maintaining correct product orientation.

Iron Cross - Mechanism used to lift product above roller surface and rotate in 90° increments to change product orientation.

Transfer Car - Portable conveyors used to pick up and deliver product between parallel conveyor lines while maintaining correct product orientation.

Minimum Pressure Accumulation - Provides an inexpensive means of accumulating products with minimum back pressure.

Zero-Pressure Accumulation - Allows product to accumulate without build-up of line pressure. Optional positive brakes for each zone. Sensor roller or photoeye controlled logic.

V-Belt Driven Live Roller Curve Conveyor

11/16 in. dia. to 2 1/2 in. dia. x 14 ga. Zinc-Plated Tapered Rollers on Curve
1.9 in. dia. x 16 ga. Galvanized Straight Rollers on Tangents

The V-Belt Driven Live Roller Curve Conveyor is a live roller curve used to make 30°, 45°, 60° or 90° turns.

- 30°, 45°, 60° and 90° Curves
- 10 in. x 1 1/2 in. x 10 ga. Galvanized Frame on Tangents, 8 in. x 1 1/2 in. x 10 ga. Galvanized Frame on Curve
- Between Frame Widths 13 in. Through 39 in.
- Self Powered or Slave Driven
- Tapered Rollers on Curve, Straight Rollers on Tangents
- Transportation Conveyor Only
- Bolt-Together Construction

Standard Specifications:

Belt - Endless "B" section V-belt.

Frame - 10 in. deep x 1 1/2 in. x 10 ga. galvanized steel channel frames with bolt on end couplers on tangents. 8 in. deep x 1 1/2 in. x 10 ga. galvanized steel channel frames on curve.

Outside rail of curve has "triple-punched" hex holes to allow skewing of rollers which affects product tracking.

Curve Roller - 2 1/2 in. dia. tapered to 1 11/16 in. dia. x 14 ga. zinc-plated rollers on 3 in. nom. centers. Grease-packed ball bearings. **Curve rollers do not represent true taper.**

Tangent Roller - 1.9 in. dia. x 16 ga. galvanized rollers on 3 in. centers. Grease-packed ball bearings.

Floor Supports - Adjustable 32 1/2 in. to 36 1/2 in. from floor to top of rollers. One support at ends of conveyor and one single leg support at center of curve.

Driving Sheave - 5 3/4 in. dia. V-belt sheave with 1 in. bore.

Pressure Sheave - 3 in. dia. V-belt sheave with 1/2 in. bore.

Idler Sheave - 3 in. dia. V-belt sheave with 1/2 in. bore or 3 in. dia. flat belt sheave with 1/2 in. bore.

Take-Up - Screw take-up with 3 in. dia. V-belt sheave with 1/2 in. bore. Provides take-up to allow for future belt tension.

Bearings - Sealed, pre-lubricated, self-aligning ball bearings.

Conveying Speed - Constant 60 FPM.

Speed Reduction - Sealed worm gear "C" face speed reducer with No. 50 chain to driving sheave.

Motor - 1/2 HP - 230/460 V - 3 Phase - 60 Hz. - totally enclosed, fan cooled.

Electrical Controls - Available as option.

Capacity - 500 lbs. total live load.

Roller Conveyors**

Optional Equipment:

Conveying Speed - Constant and variable speeds available other than standard 60 FPM.

Fixed Angle Guard Rails - 1 1/2 in. x 2 in. formed 12 ga. galvanized angle. Other heights available. Channel types available. One or both sides. **Note: If product contacts guard rails, product flow may be affected.**

Floor Supports - Heights available up to 84 in. top of leg.

Ceiling Hangers - 5/8 in. x 10 ft. long threaded rod with mounting hardware. Other lengths available.

Slave Driven - Curve to come less complete drive package and to be slaved to any belt driven live roller conveyor (V-belt or flat belt).

Other Tangent Lengths - Tangent lengths 12 in. through 48 in. available.

True Tapered Roller Curve - True tapered roller curve available. Will require special radius or special rollers.

Other Drive Types - Shaft mount to allow lower top of belt. Left hand drive.

Motors - Single phase, explosion proof, drip proof, DC motors, inverter duty, etc. Available through 2 HP.

Electrical Controls - Start/stop push-button station, reverse drum switch, one direction and reversible magnetic starters.

V-Belt Driven Live Roller Straight Spur Conveyor

1.9 in. dia. x 16 ga. Galvanized Straight Rollers

The V-Belt Driven Live Roller Straight Spur Conveyor is a live roller spur used where product lines converge or diverge.

- Bolt-Together Construction
- 30° and 45° Spurs
- 10 in. x 1 1/2 in. x 10 ga. Galvanized Frame on Head Section, 8 in. x 1 1/2 in. x 10 ga. Galvanized Frame on Spur
- Between Frame Widths 13 in. Through 39 in.
- Self Powered or Slave Driven
- Transportation Conveyor Only
