Compact Positive Pick-Up Pilots

VERSATILE & PRESS FIT — Metric

Dayton Versatile & Press Fit Compact Positive Pick-Up Pilots—mounted in a guided stripper—provide exceptional resistance to lateral deflection. A typical *longer* pilot can have several inches of exposed, unsupported surface and be susceptible to added sideways movement, stress, and wear. Dayton Compact Pilots are rigid during use; last longer; and are ideally suited for high-demand manufacturing applications.

Stronger! Not Longer

Rigid, Long-Lasting Positive Pick-Up Pilots

N=3.35+ [(P-1.45)/.728]

* Any length is available within catalog range. Specify "XL" and length. The point length is maintained. For other than standard point length use alteration code "XBR" (1.5 min.)

Designer's Choice

In specifying die set components, designers have typically chosen socalled "standard" length pilots for most highdemand applications. In recent years, however, they have begun specifying shorter length pilots -especially in larger die set configurations. Longer pilots have two or more inches of unsupported surface that is susceptible to deflection. As bending or forming takes place, this lateral deflection can create excessive forces on the pilot. Often, the strength of the pilot—as well as the function of the other die set componentsis compromised.

XAN — DayTAN® (TiAIN)

Dayton Compact Pilots provide virtually no unsupported surface that is susceptible to sideways movement, stress, or wear. Pilots—which are mounted in a guided stripper always maintain the proper extension, and there is no need to move or adjust the pilot during regrinding.

Surface Coatings

Dayton Compact Pilots can be treated to increase hardness, improve wear, etc. The available coatings and added delivery times are shown in the charts on the appropriate product pages.

DayTiN® (XNT)-a hardas-carbide (Vickers 2300) PVD coating that provides excellent lubricity when used with a lubricant.

TiCN (XCN)—a harderthan-carbide (Vickers 3000), very thin PVD film that provides superior hardness and extraordinary abrasive wear resistance.

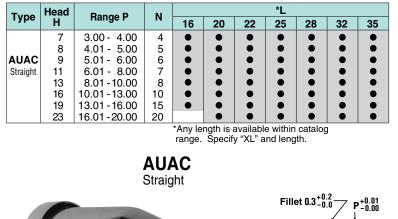

DayTAN[®] (TiAIN)—an ultrahard (Vickers 3400), highaluminum PVD coating that absorbs shear stress and provides hightemperature toughness.

Standard **Alterations**

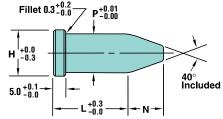

The following are standard alterations available on all **Dayton Compact Pilots:**

- **XP** P dimension smaller than standard
- **XBR** L, other than standard
- "L" shortened XL—
- **XT** Thinner head than standard
- TT— Precision head thickness
- XH— Reduced head diameter
- **XD** Reduced shank diameter

Commitment to Quality & Customer Satisfaction

Dayton Lamina is a leading manufacturer of tool, die and mold components for the metal-working and plastics industries. As a customer-focused, world-class supplier of choice, we provide the brands, product breadth, distribution network and technical support for all your metal forming needs.

Our goal is to give our customers the most innovative and valueadded products and services.

DAYTON Lamina[™]

a MISUMI Group Company

*Dayton Lamina's line of Danly products is available only to North America.
