DI-PROFILER

NEW EXTENDED TOOLHOLDER DI-PROFILER NOW AVAILABLE FROM ENGIS OR YOUR LOCAL MDP DISTRIBUTOR.

The new Di-Profiler model FPH/RL heavy duty reciprocating machine with an extended toolholder is now available from Engis Corporation or your local MDP distributor.

The toolholder length has been increased from 2-1/2" to 6". The extended length of the toolholder enables the operator to reach further with less effort and to steady the handpiece for maximum control. The FPH/RL is similar to the FPH square drive handpiece. Stroke is adjustable to 1/4" and can run at 14,000 strokes/minute. Both toolholder and the body of the profiler are cushioned with soft rubber to limit vibration. It is also equipped with an air inlet and tubing for optional cooling.

FPH/RL is supplied in a sturdy plastic case with adjustment tool, lathe adapter post, lubrication and air hose. Units are now in stock for immediate delivery.
